EDUCATION

New Jersey Institute of Technology | *Albert Dorman Honors College* September 2022 – December 2025
B.S. Computer Science | *Dean's List* GPA: 3.86/4.00

- Recipient of a full ride merit scholarship alongside a commitment of 30 volunteer hours a semester.
- **Relevant Coursework** | Discrete Math, Programming Language Concepts, Database Systems and Management, Data Structures and Algorithms, Computers, Society, and Ethics, Probability and Statistics.

SKILLS

Languages | Java, Python, JavaScript, TypeScript, C++, SQL, LaTeX

Web Development | Next.js, React.js, Tailwind CSS, HTML, CSS, Bootstrap

Software | MySQL, MongoDB, Oracle SQL, Prisma, Git, Google Colaboratory

EXPERIENCE

Prudential Financial | *Incoming Software Engineer Intern* June 2024 – August 2024
Global Technology Newark, NJ

Johnson & Johnson | *Technology Co-op* January 2024 – Present
MedTech R&D Raritan, NJ

Honors Summer Research Institute | *Machine Learning Research Fellow* June 2023 – August 2023
Albert Dorman Honors College Newark, NJ

- Engineered an iterative machine learning algorithm to predict temperature profiles of particles in metal additive manufacturing processes at a **97%** accuracy.
- Leveraged Python's **NumPy**, **Pandas**, and **SciKit-Learn** libraries to efficiently process and analyze **~ 9 million** data points.
- Automated the machine learning lifecycle using **PyCaret** to streamline feature selection, resulting in a **20%** faster deployment.
- Migrated to **Google Colaboratory** from **Anaconda** for a **200%** GPU acceleration, significantly expediting workflow processes.

EXTRACIRRICULARS

Vietnamese Student Association | *Public Outreach Officer* January 2024 – Present

- Spearheaded cultural networking events of **40+** attendees centered around Vietnamese students, alumni, and professionals.
- Collaborated with **20+** executives within on-campus cultural and professional organizations to plan and promote events.

Association for Computing Machinery | *Computer Science Tutor* September 2023 – Present

- Proctored weekly sessions and appointments, aiding **150+** undergraduate students programming with **Python**, **Java**, and **C++**.
- Utilized Socratic questioning and guided visualization to convey topics, improving students' homework scores by **~10%**.

PROJECTS

Weatherify | *Next.js, Tailwind CSS, NextAuth.js, OpenWeatherMap API, Spotify Web API, TypeScript*

- Formulated an application to provide clients personalized music recommendations based on real time weather conditions.
- Fetched personalized playlist suggestions using the Spotify Web API by incorporating asynchronous GET and POST methods.

Bank Mockup | *MySQL, Prisma, Next.js, Tailwind CSS, JavaScript*

- Orchestrated the relational database design and full stack development of a comprehensive online banking institution.
- Deployed Prisma and MySQL to store banking details, seamlessly integrating with a Next.js interface with CRUD operations.

Online Piano | <https://pianoscape.pages.dev> | *JavaScript, HTML, CSS, Bootstrap*

- Developed a web-based piano software hosted on Cloudflare granting users to play piano with key label visibility toggling.
- Programmed JavaScript event listeners and query selectors for highlighting and playing piano keys when interacted with.

NBA Player Statistics Engine | *Python, CustomTkinter, BeautifulSoup*

- Deployed the BeautifulSoup package to web scrape NBA players' career per-game statistics from Basketball Reference.
- Utilized PIL, Validators, and Requests Python libraries to verify, save, and extract data from players' corresponding web links.
